Academic Eligibility Policy for Student Athletes

Academics have and always will be the most important part of our student’s lives while attending NHCS. With that, we expect our student-athletes to uphold the high standards and expectations within the classroom while they also participate in extracurricular activities including athletics.

- Athletic eligibility for students will be determined at the close of each marking period (progress and quarterly reports). GPA from the most recent marking period will dictate eligibility for the coming marking period.
- Failure to meet these will render a student ineligible until student meets the requirement. Eligibility will be assessed throughout the quarter by two progress reports.
- Ineligible students may be allowed to practice or may be removed from the team (at the discretion of the coach). The coaching staff may mandate tutoring and/or mandatory study sessions.
- Students serving behavior/homework detentions will be ineligible for games on that day.
- Suspended students will not be permitted to participate in or attend games on the day they are serving a suspension.

Special Programs Policy Exemptions

Any student-athlete who is currently receiving special educational services and who has an Individualized Education Program (IEP) can be declared eligible by the Director of Special Programs. This determination will be made on a case by case basis and participation is by no means guaranteed.
